

A decorative graphic on the left side of the slide consisting of two overlapping parallelograms. The front one is blue and the back one is a light green color. They are positioned diagonally, with the blue one in front of the green one.

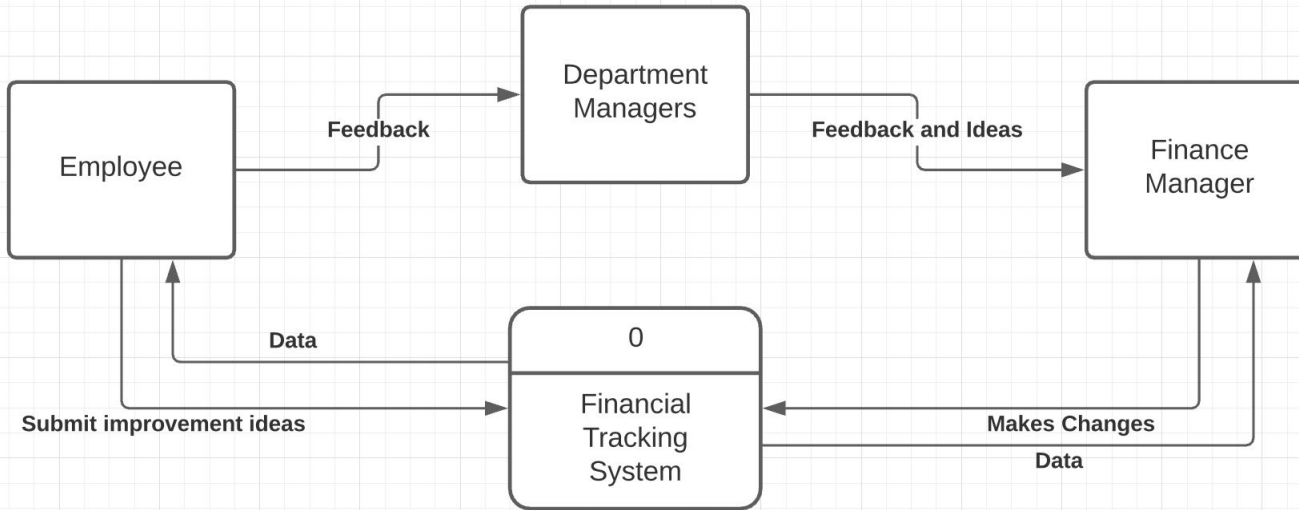

Financial Tracking System DFDs

Narrative

Quality Cruisers is a resale car dealer focusing on the experience of their clients. The company is working on keeping data on their customers, employees, future customers, and each specific department. The current system used to share financial information to the managers is based on data that has been recorded through interviews of what the employees want to be able to use to compare efficiencies and improvements that can be made for the future system. Employees are able to submit improvement ideas at any time. Other department managers report to the financial team but more directly to the finance manager with the characteristics they want present in the system. After receiving feedback (evaluations), the finance manager looks at what the current system looks like and what improvements based upon the feedback can be made. The improvements that are deemed urgent then get implemented and those that can wait to be implemented in the future get held onto for a year before discarding them. When the improvements are implemented, the finance team and other teams track the progress on how the system flows.
